

Community Foundation

ENVIRONMENT AND SUSTAINABILITY POLICY

The Community Foundation Tyne & Wear and Northumberland is committed to improving the environment and minimise the impact of our activities upon it.

We aim to:

- Reduce our greenhouse gas emissions from transport use and office energy consumption;
- Reduce the organisation's level of waste production by reusing, recycling and waste disposal initiatives;
- Procure environmentally and socially responsible goods and services and seek to use quality local suppliers and services where possible;
- Comply with all relevant environmental legislation, regulations and other requirements which relate to the company's environmental aspects;
- Ensure we manage the external site area to mitigate climate change and improve biodiversity;
- Routinely monitor the impact we have made and set targets for continuous improvements;
- Communicate the importance of environmental issues to all staff and encourage a proactive approach to these by staff;
- Communicate internally and externally our environmental policy and encourage feedback.
